			Attempt any	two parts from	n each c	luestic	on.						
			Each 1	part carries 7.	5 marks						v.		
			All que	estions are con	npulsory	<b>/.</b>							
1. (a) (i) Explain the concept of full employment budge							lus.						2.5
(ii) If consumption is negatively related to interest rate, how we affected.									would	the	IS	curv	e be 2.5
	(iii)	If the demand for money is not responsive to the rate of interest in an economy								omy,			
		how will	l this influence	the LM curve									2.5
(b)	(i)	What are	e 'automatic stal	oilizers' ? Exp	olain.					١.,			2.5
	(ii) Suppose money supply is positively related to interest rate. How would this									his a	ffect		
		the LM curve ?							2.5				
	(iii)	What is	the 'liquidity tra	uidity trap' ? Explain.					2.5				
												P.	Г.О.

	(c)	(i)	If the interest sensitivity of investment demand is equal to zero, how is the A	D
			curve impacted ?	-3
		(ii)	The AD curve is flatter (a) the larger the multiplier and (b) the smaller the incor	ne
			responsiveness of the demand for money. Explain.	1.5
2. (a)		Dist	inguish between demand side and supply side crowding out. Mention at least to	vo
		facto	ors which determine the extent of crowding out.	2.5
	(b)	Exp	lain how an increase in the price of oil leads to stagflation in the economy. Ho	w
		do r	real wages get impacted during the process of adjustment? 5, 2	2.5
	(c)	Supp	pose the government announces an anti-monopoly legislation. What impact would	l it
		have	e on national output and price level both in short-run and medium-run?	7.5
3.	(a)	(i)	Assumption of rational expectations renders monetary policy ineffective w	ith
			respect to national output even in short run. Explain with the help of Lucas supp	ply
			curve.	
R.S.		(ii)	Explain why errors of rational expectations are on average zero. 5, 2	2.5
	(b)	(i)	According to Friedman, the trade-off between inflation and unemployment exi	sts
4.0			only in short run. Explain.	
	ten ar	(ii)	Discuss any two sources of business cycles suggested by Lucas.  3.5,	4
	(c)	( <i>i</i> )	What do you understand by sacrifice ratio in the traditional Phillips cur	ve
			approach?	
		(ii)	Show that Adaptive Expectations Hypothesis allows us to relate unobserval	ole
			expected variables to observable actual variables. 3.5,	4
			그는 모든 이 병이 있다. 이 물건에서 그녀지만 있는 그렇게 된 바람이 되는 하고 싶다는 하고 있다. 다음	

- 4. (a) Assume that capital is perfectly mobile, the price level and the exchange rate is fixed.

  Answer the following:
  - (i) What is the impact on the level of economic activity when there is an increase in money supply?
  - (ii) Show that an increase in government expenditure is effective in raising the level of output in the economic. 4,3.5
  - (b) (i) What is the 'automatic adjustment mechanism'? How does it tackle the twin deficits in an economy?
    - (ii) Assuming fixed exchange rates and flexible prices, explain the effect of devaluation
       on an economy.
       4,3.5
  - (c) Distinguish between exchange rate systems—Adjustable Pegs, Crawling Pegs andManaged Floating.7.5
- 5. (a) (i) Assume perfect capital mobility, flexible exchange rate and fixed prices. Let there be an exogenous increase in the rate of interest abroad. How would this impact the output, and the exchange rate of the domestic economy?
  - (ii) "An expected change in exchange rate leads to an immediate actual change in exchange rate by an equal percentage." Explain. 4,3.5

- (b) (i) What is the exchange rate 'overshooting model'? Explain the phenomenon in the case where there is a one time increase in money stock in the economy.
  - (ii) What are the 'hysteresis effects' of overvaluation? Explain. 2.5
- (c) (i) Distinguish between the absolute purchasing power parity and relative purchasing power parity theory of the determination of exchange rates.
  - (ii) Establish that if the absolute PPP held, the relative PPP would also hold. 2.5
